

PROJECT 4 INSTALATION AND DEPLOYMENT MANUAL

PROJECT 4 Recommendation and Streaming
Platform Service

Jiajiao Xu, Jordi Vidal
GROUP 6

Contenido

Prerequisite Check	2
Installation	2
Step 1 Clone the Git repository	2
Step 2 Download the datasets	3
Deployment	4
Step 1: Add the downloaded datasets	4
Step 2: Install the dependencias	5
Step 3: Run the application	5

Prerequisite Check

Before starting, verify that Python is installed and have the versión 3.14 or higher on the computer by running:

```
python --version
```

If that does not work, try:

```
python3 --version
```

We have to see something like this:

```
PS C:\Users\Jordi> python --version
Python 3.14.3
PS C:\Users\Jordi>
```

If Python is not installed or the versión is lower tan 3.14, install it first before continuing in:

<https://www.python.org/downloads/>

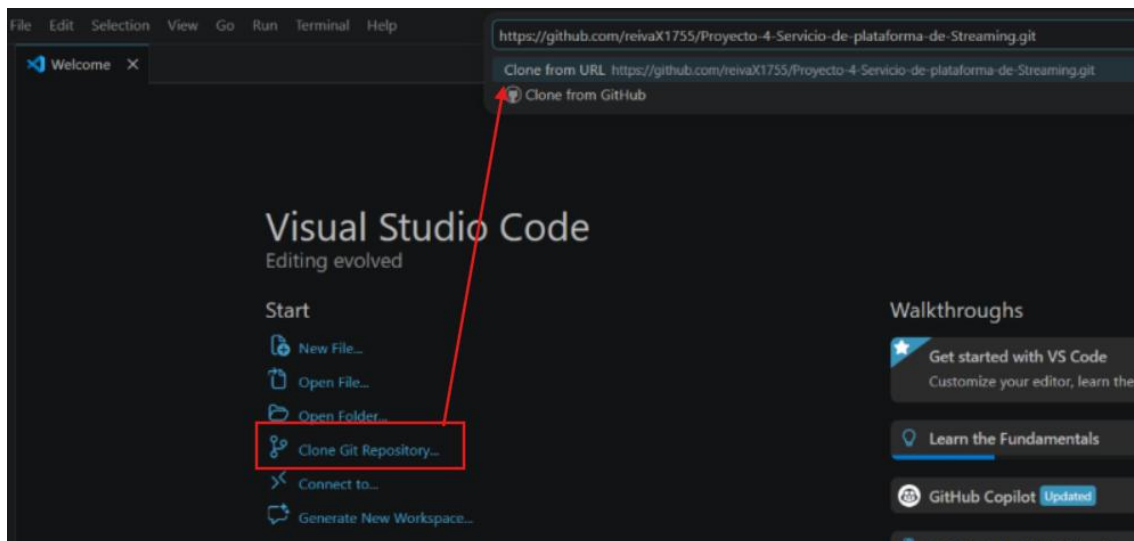

Installation

Step 1 Clone the Git repository

Clone the project repository using the following command:

```
git clone https://github.com/reivaX1755/Proyecto-4-Servicio-de-plataforma-de-Streaming.git
```

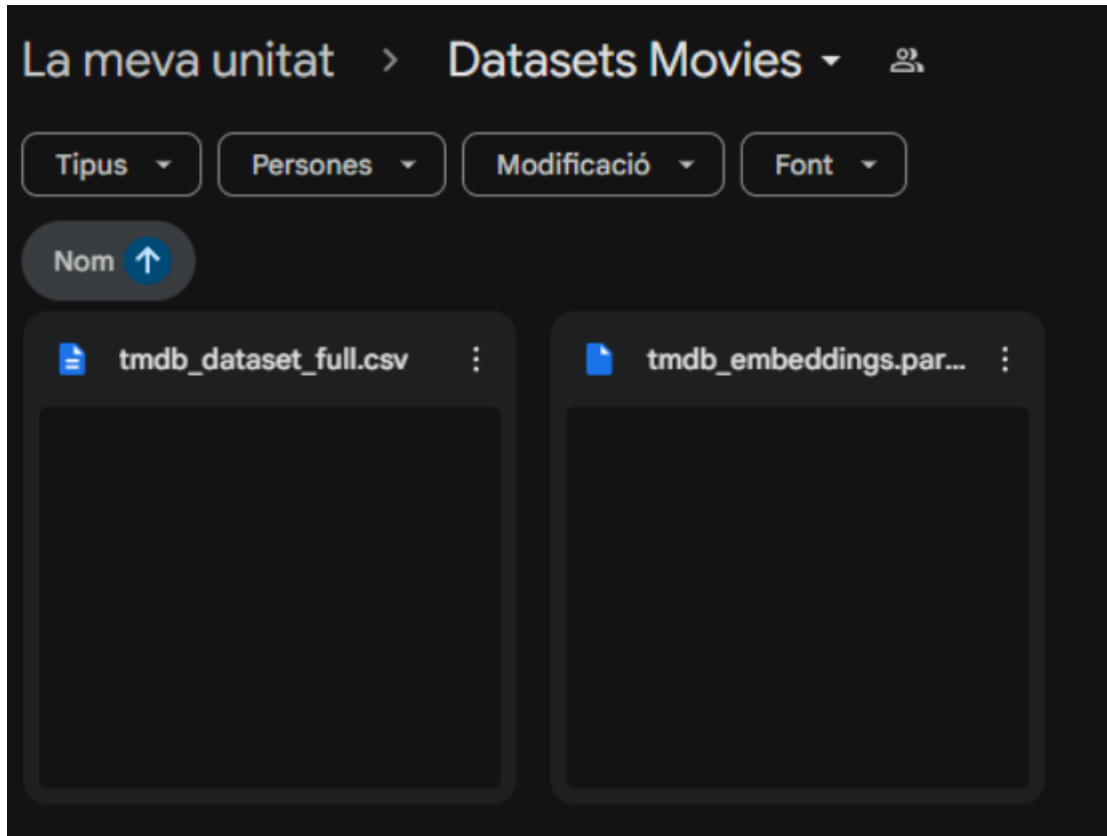

Or simply in visual studio, clone repository:

Step 2 Download the datasets

Once the repository is cloned, download the required datasets from:

https://drive.google.com/drive/folders/1kuFtIGV_fTRWykWmEs7PKzE6W7gbXM1E?usp=sharing

Unzip the file:

	Datasets Movies-20260426T162047Z-3-0...	26/04/2026 18:21	Archivo WinRAR ZIP	145.523 KB
	Datasets Movies	26/04/2026 18:21	Carpeta de archivos	

Deployment

Step 1: Add the downloaded datasets

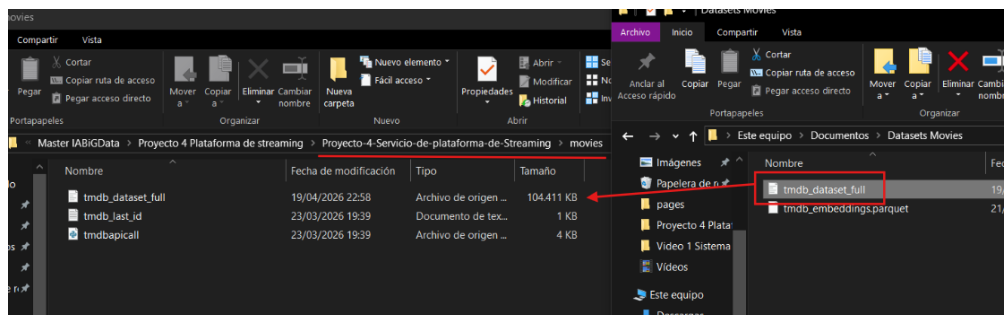

Place the downloaded datasets in the required directory, for the .parquet:

Proyecto 4 Servicio-de-plataforma-de Streaming>data>embeddings>tmdb_embeddings.parquet

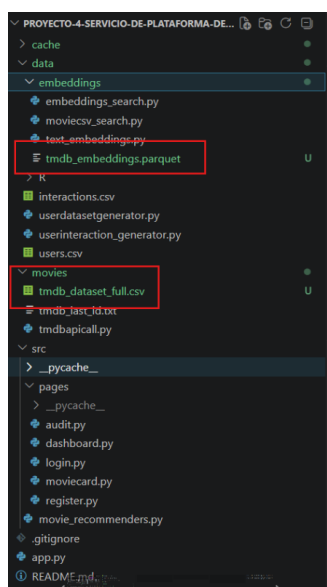

For the .csv:

Proyecto 4 Servicio-de-plataforma-de Streaming>movies>tmdb_dataset_full.csv

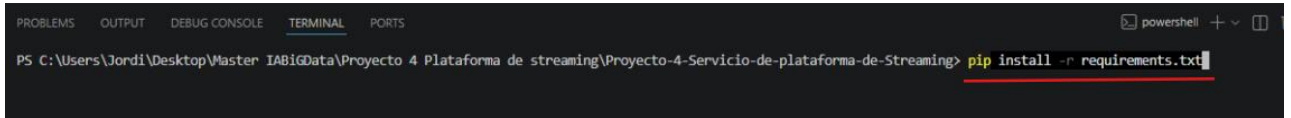

Check that all is in place:

Step 2: Install the dependencias

Install the project requirements with:

```
pip install -r requirements.txt
```

```
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS
PS C:\Users\Jordi\Desktop\Master IABIGData\Proyecto 4 Plataforma de streaming\Proyecto-4-Servicio-de-plataforma-de-Streaming> pip install -r requirements.txt
```

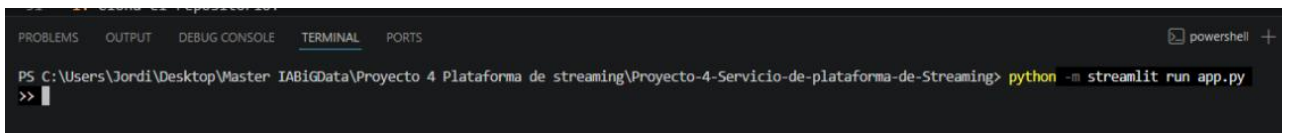

Step 3: Run the application

Start the Streamlit application with one of the following commands depending on your python path:

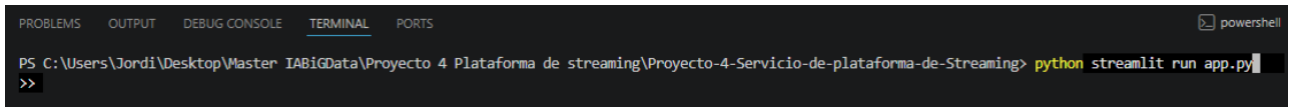

```
python -m streamlit run app.py
```

or

```
python streamlit run app.py
```

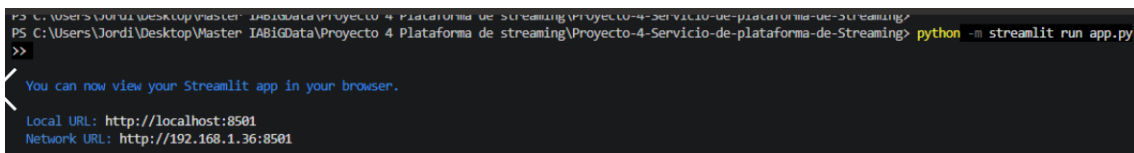

```
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS
PS C:\Users\Jordi\Desktop\Master IABIGData\Proyecto 4 Plataforma de streaming\Proyecto-4-Servicio-de-plataforma-de-Streaming> python -m streamlit run app.py
>>
```

```
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS
PS C:\Users\Jordi\Desktop\Master IABIGData\Proyecto 4 Plataforma de streaming\Proyecto-4-Servicio-de-plataforma-de-Streaming> python streamlit run app.py
>>
```

Verify that the application is running:

```
PS C:\Users\Jordi\Desktop\Master IABIGData\Proyecto 4 Plataforma de streaming\Proyecto-4-Servicio-de-plataforma-de-Streaming> python -m streamlit run app.py
>>
You can now view your Streamlit app in your browser.
Local URL: http://localhost:8501
Network URL: http://192.168.1.36:8501
```
